JIAHAO (CARL) SHI

PRODUCT MANAGEMENT | CONTENT & CREATOR PRODUCTS | AI

Los Angeles, CA | carlshi617@gmail.com | +1 669-233-3505 | carlshi6.github.io

Summer 2027 Availability: May 13 - Aug 23, 2027 | Available for 12+ weeks | U.S. work authorized

EDUCATION

University of Southern California | M.S., Integrated Design, Business and Technology **Expected 05/2028**

New York University | B.S., Computer Science; Minor, Integrated Media Design **05/2026**

EXPERIENCE

Build Hope | Product Strategy & Operations Consultant **Sep 2026**

USC Iovine and Young Academy client engagement | Los Angeles, CA

- **Delivered a 5-phase, 30-day content operations roadmap.** Developed a CMS playbook around staff capacity and publishing needs; a later review showed 8 social media posts by Oct 19 versus 6 across Jul-Sep.
- **Helped select a social media management platform.** Compared ~8 tools with the client team, personally tested 3, and recommended Metricool based on analytics, workflow fit, and cost.
- **Proposed a short-form content experiment.** Recommended turning existing event photos and videos into repeatable social media series, with views, engagement, and follower changes as early evaluation metrics.

Xfanatical | Assistant Software Engineer Intern **Jun - Sep 2025**

- **Merged reviewed features into an internal web app.** Implemented employee profile and leave-management functionality with Vue 3, JavaScript, Python, MongoDB, and REST APIs; incorporated GitHub PR feedback.
- **Fixed employee-profile display errors.** Traced issues to frontend data transformation and empty-field handling, corrected the logic, and verified API behavior with Postman and mock data.
- **Revised delivery estimates as requirements changed.** Sequenced tasks around engineering dependencies and PR review cycles; shared updated ETAs and blockers in daily engineering check-ins.

SELECTED PROJECTS

AI PC Build Advisor | Technical Product Lead, AI-Assisted Prototype **Summer 2026**

- **Turned 5 user interviews into MVP priorities.** Combined novice buyer feedback with competitive research to prioritize use-case recommendations and part comparisons over less essential features.
- **Iterated an AI-assisted prototype through 37 merged PRs.** Directed AI-generated implementation of PC recommendations, up-to-3-part comparisons, replacements, compatibility warnings, and recalculated pricing; manually tested core flows.
- **Identified a recommendation-trust gap in 3-user testing.** Users liked quick PC configurations but questioned the reasoning behind AI recommendations, making clearer explanations a priority for future iteration.

Dog Behavior Camera | Computer Vision & IoT Prototype **2025**

- **Iterated dog detection from image checks to live-dog trials.** Built a Raspberry Pi prototype with Python, OpenCV, and YOLO; added visual detection overlays and tuned thresholds and temporal buffering to inspect behavior classifications and filter transient actuation signals.

SKILLS

Product & Research: Product Requirements, User Interviews, MVP Scoping, Feature Prioritization, Roadmaps, Competitive Analysis, User Flows, Figma

Analytics & Collaboration: Data Cleaning & Analysis, KPI Definition, Social Media Content Analysis, Stakeholder Communication, Technical Documentation

Engineering & AI: Python, C++, JavaScript, Vue 3, REST APIs, MongoDB, Postman, Git/GitHub, LLM-assisted Prototyping, OpenCV, YOLO
