CARL SHI

PRODUCT MANAGEMENT | AI PRODUCT DEVELOPMENT | DESIGN & ENGINEERING

Los Angeles, CA • carlshi617@gmail.com • carlshi6.github.io
linkedin.com/in/carl-shi-0a3843254 • github.com/CarlShi6

Product-focused builder combining user research, product strategy, software engineering, and AI-assisted prototyping to turn ambiguous problems into testable experiences.

EDUCATION

University of Southern California | M.S., Integrated Design, Business and Technology — Expected May 2028

New York University | B.S., Computer Science; Minor, Integrated Design & Media — May 2026

EXPERIENCE

Build Hope | Product Strategy & Operations Consultant | USC Client Project — Sep 2026

- Translated stakeholder goals and resource constraints into a 5-phase, 30-day content operations roadmap, CMS playbook, and measurable engagement KPIs.
- Researched approximately 8 software platforms and hands-on tested 3 for analytics, scheduling, and workflow fit; recommended Metricool to client stakeholders.

Xfanatical | Assistant Software Engineer Intern — Jun – Sep 2025

- Shipped 8 reviewed pull requests across 3 internal employee-facing modules (profiles, leave management, analytics) using Vue 3, Python, MongoDB, and REST APIs.
- Resolved data-transformation and missing-value defects; validated API edge cases with Postman and mock data in collaboration with engineers.

SELECTED PROJECTS

AI PC Build Advisor | Independent AI Product & Web Application — Jun 2026 – Present

- Used 5 user interviews and competitive research to define priorities for guided PC recommendations, component comparison, and compatibility checks; launched a public web app.
- In 3 usability tests, all participants found suggestions useful while 2 questioned recommendation reliability; added explainable trade-offs, source-confidence indicators, and non-live pricing disclosures.
- Prototyping image-based component identification and a Three.js exploded-view interface to make complex PC builds easier to inspect and refine.

Visual Research for Eagle.cool | AI-Assisted UX Concept | Figma Prototype — 2026

- Designed a multi-reference visual search workflow with editable AI interpretations, optional image annotations, and user-controlled search feedback; prototype only, not a shipped plugin.

Transit Decision Dashboard | Product & Interaction Design Prototype — 2026

- Designed a multi-source transit exploration dashboard with layered maps, route scenarios, and cost-versus-impact comparisons for decision-making.

Dog Behavior Camera | Computer Vision & IoT Prototype — 2025

- Built a Raspberry Pi / YOLO monitoring prototype with an 8-behavior classifier, temporal buffering, and physical actuation; reached approximately 90% accuracy in offline evaluation.

SKILLS

Product & Design: Product Requirements, Roadmaps, User Interviews, Usability Testing, Competitive Research, Figma, Interaction Prototyping

Data & AI: Python, Data Cleaning & Validation, KPI Definition, Model Evaluation, OpenCV/YOLO, AI-Assisted Prototyping

Engineering: JavaScript, React, Vue 3, HTML/CSS, REST APIs, MongoDB, Git/GitHub, Postman, Three.js
